

# SIP STATION LICENSE

when **communication is critical**

## FEATURES

- Increases the usability of the STENTOFON AlphaCom E
- Creates more connectivity options
- Made for Critical Communication over IP - CCoIP®
- Enables the connection of standard SIP telephones or
- PC/PDA clients
- Easy to configure and manage for STENTOFON
- Certified SIP units
- Caller and calling name and number display text

## DESCRIPTION

The SIP Stations License for STENTOFON AlphaCom E makes it possible to connect STENTOFON certified SIP equipment via IP.

The license makes it possible to take advantage of many of the useful features associated with SIP based IP telephony equipment between the SIP stations themselves and the other STENTOFON stations. The sound quality is excellent across the network when using the wideband codecs included in the STENTOFON AlphaCom E node.

## SPECIFICATIONS

|                       |                                                                                                                                                                                 |

## SIP STATION LICENSE

### SERVICE

In case of service replacement of an AMC-IP card, all licenses will remain available for a short period of time. A new lasting license key must be obtained for the new AMC-IP card during this period.

### ADDITIONAL LICENSES

Additional licenses can be purchased at any time. Any new license will be added to already purchased licenses for the same hardware. A new License Key will be issued to replace the existing License Key; this will cover all the new and old legal licenses.
