FEENICS INTEGRATED ACCESS POWER 75W / 4 Doors 8 Auxiliary Class II Outputs

## **Overview**

Feenics Integrated Access Systems combine FlexPower® power modules alongside Mercury Security™ access hardware in one compact and secure solution.

TThe FPO Power Supply / Battery Charger is selectable for 12 or 24 VDC and provides two power outputs. One output provides continuous output power for system use, the second is resettable output power, activated when the fire alarm disconnect is initiated.

For access or lock power, a D8P provides eight class 2 power limited outputs rated at 2.5A per output, each individually programmable for constant output or FAI disconnect.

LSP enclosures are painted steel with removable backplate and include lock, two (2) keys, tamper switch and din rail for SSC mounting.
