ULTRASONIC LEVEL SWITCH, TRANSMITTER, AND CONTROLLER DL14 SERIES ECHOPOD

DESCRIPTION

The **DL14 EchoPod** ultrasonic level switch, transmitter and controller provides non-contact measurement of fluid level in tanks up to 49.2" (1.25m) in depth. The **DL14 EchoPod** is a compact, multi-function sensor with the WebCal PC user interface for configuration and calibration. The **DL14 EchoPod** combines four relays, a 4-20 mA output, and control for one or two pumps or valves.

The rugged PVDF enclosure is well-suited for a wide range of corrosive, waste, or slurry type media. It can be broadly applied to atmospheric day tanks, process vessels, dispensers, pump lift stations, and waste sumps. Level indication and control may be monitored via a local display or through the BAS.
