

# LEVEL & LEAK DETECTION

## FLOAT LEVEL SWITCHES F7 SERIES

### DESCRIPTION

The **Solutions with Innovation F-7 Series** float level switches provide an economical solution to monitoring liquid levels in tanks and other vessels. Magnets within the float actuate the hermetically sealed reed switch on rising or falling levels. Switches are available in horizontal or vertical mounting configurations. Vertical floats are shipped in the normally open position. The switch action can easily be reversed by removing the float, rotating it 180° (end-to-end), and replacing the float on the stem. The operation of the horizontal floats can be changed by rotating the entire switch 180°.

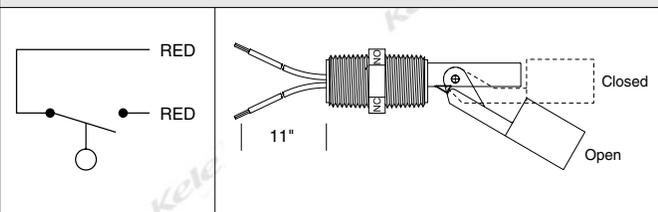

### FEATURES

- **Low cost**
