COMBINATION CARBON MONOXIDE SENSOR WITH CO₂, RH, OR VOC

KCOC SERIES

DESCRIPTION

The **KCOC Series Combination Carbon Monoxide Sensors** pair a CO sensor with a CO₂, RH, or VOC sensor in the same enclosure—reducing installation time and space required. The unit provides visual indication and analog output of CO levels in enclosed spaces such as schools, offices, malls, and theaters. The analog output is available as 0-10V or 4-20 mA and is scaled from 0-200 ppm of CO. Optional sensor has the same analog output. The unit is pre-calibrated with a factory default setting of 20 ppm of CO. The sensors are equipped with pushbutton calibration and an easily accessible calibration port for field maintenance. Optional audible alarm indication, LCD display, or relay output are available. The LCD display can be setup to display either parameter.

FEATURES

- **Combines CO sensor with CO₂, RH, or VOC sensor**
- **LED status indication**
- **Pre-calibrated to 20 ppm CO level**
- **0-10V or 4-20 mA output**
- **Optional relay output**
- **Isolated power and output**
