NATIVE IP PUBLIC ADDRESS & GENERAL ALARM SYSTEM

**VINGTOR**

VINGTOR is world-renowned for its extensive knowledge in the design, construction, installation and maintenance of integrated marine communication systems. Leveraging our long-term experience serving the maritime industry, we offer an impressive portfolio and provide cutting edge solutions to vessels worldwide under the brand name of VINGTOR®. The VINGTOR brand underpins our reputation as a supplier of the most flexible, reliable and advanced communication systems available today.

#### MEETING YOUR REGULATORY REQUIREMENTS

All VINGTOR products that form a part of critical communication have been tested according to IEC 60945, IEC 60533 standards, and comply with SOLAS regulations and codes relevant to on-board communication systems. Our systems are delivered in accordance with the rules of all major classification societies.

#### FOR ALL YOUR SALES & AFTER SERVICE REQUIREMENTS

VINGTOR is a specialist provider of spare parts, repairs, maintenance contracts and refit solutions. Responsibility and availability are our guidelines and customer support and service a first priority.

# VINGTOR EXIGO

## NATIVE IP PUBLIC ADDRESS & GENERAL ALARM SYSTEM

The VINGTOR Exigo system is specially designed to meet the demands of public address and general alarm systems for offshore installation and ships. The system is scalable and offers a set of standard and optional features making it ideal for all kinds of ships and offshore installations.

The system can also utilize innovative addressable IP loudspeakers. The IP loudspeakers are individually addressable, configurable and monitored. Each IP loudspeaker features maximum 10 watt audio effect. One system controller can handle up to 500 IP loudspeakers. More IP loudspeakers can be added by adding one or more system controllers to the system.

The VINGTOR Exigo system supports the VINGTOR integrated PA and GA solution. This solution is type approved for public address and general alarm. Together with the VINGTOR ACM, the VINGTOR Exigo system is cost efficient where loudspeaker loops are used together with the integrated ACM units to cover areas where PA and GA are required.

The system is delivered in one or more racks with all internal wiring and configuration done according to customer specifications.

### FEATURES

- Fully IP PA and GA system made for offshore and ship environments
- Addressable IP loudspeakers supporting PoE (10 Watts)
- Full monitoring of system components, call panels and speaker loops
- Power amplifiers 100/70 volt line with Ethernet interface
- Supports 250 PA zones
- Supports 150 IP call/alarm panels
- Control inputs and outputs
- Analogue audio inputs and outputs
- Mains 115/230 Vac and 24/48 Vdc emergency power with automatic switch over
- Integration with PBX, typhoon and fire alarm
- Supports VINGTOR integrated PA, GA and intercom solution

# EXIGO FLOWIRE

## FLOWIRE

The Flowire converter enables ethernet to run on the same two wires as power, giving simpler cabling and opens up for longer cable hauls.

The Flowire converter is also capable of powering the ethernet device attached to it.

Note!

Flowire is needed for Ex Call & Alarm Panels

1008080110

## FCDC1 FLOWIRE ETHERNET CONVERTER, DC VOLTAGE

- One single pair of cable can be used to distribute power and data
- The cable hauls can be longer, reducing the need for switches and/or repeaters
- Up to 10 Flowire devices can be connected to the same 2-wire cluster
- Existing infrastructure can be used, even though only a single pair is available. This reduces the total cost of retrofit projects
- The Flowire converter can be used with any Ethernet enabled device (not limited to VINGTOR products)
- Power 24 VDC
- Important note! Several clusters can not share same cable or junction boxes.

Size (WxHxD): 120 x 65 x 13 mm Weight: 0.3 kg

Additional Information: Protection IP-20

# EXIGO MONITORING

## ELTSI-1

The ELTSI-1 line end transponder is designed for use on ships and offshore environments. Hence, the construction is very robust and can handle mobile environments as well as stationary, temperature controlled rooms.

The line end transponder ensures reliable monitoring of the loudspeaker lines. Where impedance measurements may result in an erroneous report of a broken line, the line end transponder will always report the correct health of the loudspeaker loop.

Up to 10 line end transponders may be connected to the same amplifier output, making it possible to branch out the loudspeaker loops

1023540000

### ELTSI-1 EXIGO INDUSTRIAL LINE END TRANSPONDER, IP67

- Loudspeaker line end transponder
- Powered from and communicates over the loudspeaker lines
- Small and simple to install
- Rugged and weather proof housing

Size (WxHxD): 66 x 106 x 53 mm Weight: 0,350 kg

Additional Information: IP-67
